## SPECIMEN PLANTS

Where only 1 measurement is given, it is the height or diameter of the plant, whichever is greater.

Acanthocalycium violaceum	- 3 in. specimen	1.00
Ancistrocactus brevihamatus	- 4 in. specimen	1.50
Arequipa leucotricha	- 12 in. specimen on 8 in. stock, total height 20 in.	3.00
Astrophytum asterias	- 3 in. specimens	.75
" capricorne aurea	- 2½ in. flowering size	1.00
" senilis	- 2½ in. flowering size	1.00
" myriostigma coahuilense	- 3 in. flowering size specimens	2.00
" columnaris	- 2½ in. flowering size	.75
" potosina "Bishop's" cap	- 2½ in. flowering size	.75
" tamaulipensis	- 3½ in. flowering size	2.00
" tetragona	- 3 in. specimen - flowering size	1.50
" "	- 2½ in. specimen	1.00
" ornatum	- 6 in. specimen	3.50
Cephalocereus senilis	- "Old Man Cactus" - 22 in. high	15.00
" "	- " " " - 10 in. high	3.00
" "	- " " " - 6 to 7 in. high	2.00
Cereus peruvianus monstrosus	- 33 in. high, 6 short branches at base	5.00
" "	- 27 in. high, one 12 in. branch at base	3.50
Coryphantha georgii	- 7 in. specimen	2.50
" "	- 3½ in. specimen	1.50
" exsudans	- 10 in. high, 4 in. in diameter, with one offset - a very fine specimen	2.00
" pallida	- 3 in. imported plant	1.50
Echinocactus grusonii	"Golden Barrel"-beautiful golden spines-12 in. dia.	15.00
" "	" " " " " " " 9 in. diameter	10.00
" "	" " " " " " " 4 to 5 in. dia.	2.00
" ingens	- 3 headed specimen, each head 3½ in. in diameter	2.00
Echinocereus fitchii	- 3 to 4 in. specimens	.75
Echinopsis calochlora	- 3 in. flowering size	1.00
" eyresii	- large 5 to 6 in. flowering size	1.50
" hamatacantha	- 3 in. specimens	1.00
" leucantha	- 5 in. high x 4 in. dia. - a non-offsetting species	1.50
" rhodantha variety robusta	- 5 in. specimen	1.50
" Assorted 4 in. flowering size hybrids	- \$1.00 each, 6 different.	5.00
Eriosyce korethroides	- 8 in. high by 5 in. in diameter.	3.00
Euphorbia cereiformis	- immense cluster 20 in. diameter. A show specimen	5.00
" "	- small 15 stem clusters	.75
" marmillaris	- small clusters 5 in. in dia. with about 20 stems.	.75
Ferocactus alamosanus	- 3 headed specimen, each head 4 in. in diameter	6.00
" "	- 2 headed specimen, each head 5 in. in diameter	5.00
" "	- single head - 4½ in. specimen	2.00
" covillei	- 4 in. specimen	1.00
" echidne	- 4 headed cluster, heads 2½ to 3 in. in diameter	2.00
" "	- 5 headed cluster, heads 2½ to 4 in. in diameter	3.00
" horridus	- 4½ to 5 in. specimens	1.50
" melocactiformis	- 5 in. in diameter	2.00
" "	- 4 in. in diameter	1.50
" wislizenii	- 8 in. specimen	2.50
Gymnocalycium delaeii	- 2½ in. in diameter	1.00
" saglione	- 5 to 6 in. in diameter	3.00
" "	- 4 in. in diameter	1.50
" "	- 3 in. in diameter	1.00
" "	- 2½ in. in diameter	.75
" schickendantzii	- 4½ in. specimen	3.50
" "	- 3 in. specimen	2.00
Hamatocactus hamatacanthus variety Davisii	- long hook spines, 3 in. specimen	1.00
" setispinus	- large cluster 7 in. in diameter, 20 heads	2.50
Homalocephala texensis	- 5½ in. in diameter	1.50
" "	- 4 in. in diameter	1.00
Lemaireocereus montanus	- 22 in. high, 3½ in. dia. Unusually fine specimen	7.50
" "	- 15 in. high 2 in. in diameter	2.00
" pruinus	- 3 branched specimen, 14, 18 and 21 in. high respectively, 2 smaller ones at base. a beautiful show piece	5.00
Lobivia allegriana	- large cluster 6 in. across, 20 or more heads	2.50

Machaerocereus eruca - "Creeping Devil" - large 30 stem cluster . . . . .	7.50
" " " " -15 stem cluster, stems 5 - 9 in. . . . .	5.00
" " " " -2 stemmed specimen, 4 & 11 in. . . . .	1.50
Malacocarpus corynoides - 3 in. specimens - very rare. . . . .	2.00
Mamillaria albida - 4 in. specimen. . . . .	2.00
" calacantha - 5 in. high by 3½ in. in diameter. . . . .	2.50
" carnea - 2½ in. specimen . . . . .	1.00
" celsiana - large 4 headed cluster, 7 in. in diameter . . . . .	3.00
" " - 2 headed specimen, 6 in. high . . . . .	1.50
" centricirrha - 3 in. specimen . . . . .	1.00
" compressa - beautiful conic cluster, long spined variety, 9 in. high, 9 in. in diameter, over 50 heads . . . . .	10.00
" compressa - conic cluster, short spined variety, 7 in. high, 7 in. in diameter, over 30 heads. . . . .	7.50
" compressa - 10 in. diameter, 19 heads - a beautiful cluster . . . . .	6.00
" " - 3 in. single heads. . . . .	1.00
" compressa variegata - cluster 6 in. in diameter with 21 heads - shows definite variegation. . . . .	3.50
" crucigera - 2½ in. specimens . . . . .	1.00
" dealbata - white spined, 2 in. flowering size. . . . .	1.00
" durispina - 3 headed cluster, main head 6 in. high, with 2 smaller heads each 2½ in. in diameter . . . . .	2.50
" fuscata - golden yellow spines - 7 in. specimen . . . . .	3.00
" " " " - 3½ in. specimen . . . . .	1.50
" gigantea - 5 in. in diameter . . . . .	2.50
" macdougalii - 6 in. high, 5 in. in diameter . . . . .	2.50
" magnimamma - 3 in. specimen . . . . .	1.50
" oreuttii - 2½ in. specimen. . . . .	1.00
" parkinsonii - 6 headed imported cluster . . . . .	3.00
" " - 4 headed " " . . . . .	2.00
" " - 2 headed " " . . . . .	1.50
" " - single heads, 2½ in. in diameter . . . . .	.75
" pringlei - 2 headed specimen, each head 3½ in. in diameter, yellow spines, red flower . . . . .	3.00
" " - 2½ in. specimens . . . . .	1.00
" schmollii - many headed cluster, 4 to 5 in. in diameter . . . . .	1.50
" vaupelii - 3 in. specimens . . . . .	1.50
Neolloydia raphidacantha - 6 in. specimen . . . . .	1.50
Neoporteria subgibbosa - 9 in. high, 5 in. in diameter . . . . .	3.00
" " 2 - 3 in. flowering size . . . . .	1.00
Notocactus mammulosus var. pampeanus - 4 in. heavy spined specimens . . . . .	1.50
" " " " - 2½ in. flowering size specimens . . . . .	.75
" schumannianus - 4 in. in diameter. . . . .	2.50
" submammulosus - 3½ in. flowering size specimens . . . . .	1.00
Oreocereus trollii - long haired, 6 in. specimens . . . . .	2.00
" " " " 3 to 4 in. specimens . . . . .	1.00
Pilocereus polylophus - 16 in. high, 3½ in. in diameter . . . . .	6.00
" " - 7 in. high . . . . .	2.00
Stapelia - 10 different named varieties, large, flowering size clusters . . . . .	5.00
Stenocactus lamellosus - 3 in. in diameter . . . . .	1.50
" zacatecensis - 2 in. specimens. . . . .	.75
Thelocactus bueckii - 3 in. imported specimens . . . . .	2.00
" crassihamatus - strong hook spines, 4 headed specimen, each head 2 in. in diameter . . . . .	2.50
" " - 3½ in. in diameter . . . . .	1.00
" heterochromus - 2½ in. in diameter - very rare . . . . .	1.00
" nidulans - long spines, 3 in. specimen . . . . .	1.00
" saueri - 2½ in. imported specimens . . . . .	1.50
" saussieri - large 5 in. imported specimen . . . . .	2.00
" " - large 4 in. " " . . . . .	1.50
Trichocereus bertramianus - 15 in. high x 6 in. dia. 2 small offsets at base . . . . .	5.00
" " - 10 in. high by 6 in. in diameter. . . . .	3.50
" " - 6 in. high by 3½ in. in diameter. . . . .	2.00
" candicans - 8 in. high with 5 offsets at base, heavy spined var. . . . .	3.00
" chilensis - 10 in. specimen . . . . .	2.50
" pachanoi - bright shiny green, nearly spineless - 5 branches 21 in. to 31 in. high . . . . .	4.00
" pasacana - 8 in. high by 5 in. in diameter, strong spines . . . . .	2.50
" poco - 2½ in. specimens . . . . .	.50
